# Voya Securitized Credit Fund

**Experienced & skilled team:**

Stable, experienced team focused on managing across the securitized spectrum. Managers leverage resources and perspectives across Voya's broader fixed income platform of over 250 professionals<sup>3</sup>, including specialty teams such as dedicated risk management.

**Target attractive yield****with less duration:**

Securitized assets typically have comparable yield yet lower duration than traditional fixed income sectors. The Fund maintains an investment grade effective average credit quality.

**Differentiated approach:**

"Through the cycle" approach focused on consistency and risk-adjusted returns across market cycle.

**Enhancing yield potential**

Every fixed income investor wants the most yield they can get for their level of risk, and securitized credit has traditionally offered a higher spread relative to comparably-rated corporate bonds.

**Historic spread premium to equivalent corporate bonds**

Four-year average spread to corporate bonds

Spread measured over four years, to AAA and BBB corporate indexes. Student loan spread average is from 07/31/24-12/31/24; other spread averages are 12/31/20-12/31/24. Source: Bloomberg, FRED. BBB spreads are to the ICE BofA Baa OAS Index; AAA spreads are to the ICE BofA AAA OAS Index.

**Diversifying risk**

Adding a securitized credit allocation serves to add assets with distinct credit cycles and low correlation to other fixed income assets and equities, helping reduce risk in multisector/multi-asset portfolios.

**VCFIX correlation to other asset classes**

Correlation measured from 4/1/15 - 3/31/25. Source: Voya IM. Bloomberg U.S. Corporate High Yield Index (High Yield), Bloomberg Corporate Index (IG Corporate), Bloomberg U.S. Treasuries Bellwethers (U.S. Treasuries), Bloomberg U.S. Aggregate Index (U.S. Aggregate), S&P 500 Equity Index (S&P 500).

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year. Performance does not account for taxes. Returns for the other share classes vary due to different charges and expenses.

**All investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. You could lose money on your investment and any of the following risks, among others, could affect investment performance. The following principal risks are presented in alphabetical order which does not imply order of importance or likelihood:** Credit; Credit Default Swaps; Currency; Derivative Instruments; Environmental, Social, and Governance (Fixed Income); Foreign (Non-U.S.) Investments/ Developing and Emerging Markets; High-Yield Securities; Interest in Loans; Interest Rate; Liquidity Market Disruption and Geopolitical; Mortgage- and/or Asset-Backed Securities; Other Investment Companies; Prepayment and Extension; Securities Lending; Sovereign Debt; U.S. Government Securities and Obligations; When-Issued, Delayed Delivery and Forward Commitment Transactions. **Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risks.**

The **Fi360 Fiduciary Score®** is a peer percentile ranking of an investment against a set of quantitative due diligence criteria indicative of prudent fiduciary management. Each investment is evaluated against nine individual factors and thresholds, with points allotted if it fails a particular criterion. Investments with 0 points are automatically given an Fi360 Fiduciary Score® of 0. Every other investment is given a Score of 1-100 representing their percentile ranking. The lower the Score, the better. The Fi360 Fiduciary Score® should not be used as the sole source of information in an investment decision. Visit [Fi360.com/Fi360-Fiduciary-Score](http://Fi360.com/Fi360-Fiduciary-Score) for the complete methodology.

The **Morningstar Rating™** for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Rankings do not take sales loads into account.
